Summary

Software Development Engineer with 2.5 years of experience building and maintaining mission-critical systems in the airline domain. Strong focus on frontend-heavy systems, reliability, automation, and performance optimization. Experienced with React, Node.js, Python and CI/CD pipelines.

Professional Experience

Amadeus Software Labs India Pvt Ltd — Bangalore, India

Software Development Engineer — July 2023 - Dec 2025

- Owned end-to-end development of multiple Boarding Pass generation workflows using React, Python backend services, and REST APIs, deployed in a mission-critical airline system handling production traffic.
- Built and enhanced Python-based services and scripts for business logic, data processing, and API integrations, ensuring correctness and performance under high load.
- Automated test pipelines using Python (pytest), Bash scripting, and CI/CD tools (Jenkins), improving test reliability and maintainability by 90%+ across regression suites.
- Collaborated closely with frontend, backend, and QA teams to integrate React UI components with Python/C++ services, improving overall user experience and system stability.
- Led data centre decommission and migration activities, coordinating service cutover with zero production downtime for airline operations.

Education

Vellore Institute of Technology — July 2019 - June 2023

Bachelor of Technology, Computer Science

8.62 CGPA

Skills

- Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, Bash
- Frontend: React.js, HTML, CSS
- Backend: Node.js, Express, REST APIs
- Databases: MongoDB, SQL
- DevOps & Tools: Git, GitHub, Jenkins, CI/CD, JIRA, Confluence
- Methodologies: Agile, SAFe

Projects

- Log Viewer
  - Link: https://chatterjeedeep08.github.io/log-viewer
  - Description:
    - Built a React-based log viewer capable of handling 100,000+ log lines without UI freezes using efficient parsing, state management, and rendering optimizations.
    - Implemented real-time report generation and filtering to support debugging large-scale systems.
    - Focused on performance, memory usage, and responsiveness for large datasets.

- Minimal Browser
  - Link: https://github.com/chatterjeedeep08/Light-browser
  - Description:
    - Developed a minimal Electron-based browser with a custom WebView, hideable toolbar, and navigation controls.
    - Reduced memory overhead by removing unnecessary Electron defaults, optimizing preload scripts, and managing WebView lifecycle.
- Personal Portfolio
  - Link: https://github.com/chatterjeedeep08/portfolio
  - Description: Built and deployed a responsive personal portfolio using React, focusing on performance, accessibility, and clean UI.

- E - commerce Store (In-progress)
  - Description:
    - Designing a MERN-based e-commerce platform with JWT authentication, modular backend architecture, and reusable React components.
    - Implemented initial product listing, cart structure, and API contracts (work in progress).

Certifications

- Google UX Design Professional Certificate, Google
- Microsoft Certified: Azure Fundamentals, Microsoft
- Microsoft Certified: Azure Data Fundamentals, Microsoft
